First JetBlue, Now JetSuite

Apr 23, 2008 12:00 PM

A founding member of JetBlue announced the creation of JetSuite, a concept that will allow jet owners to couple private ownership with the ability to have the aircraft chartered out through JetSuite.

JetSuite President Alex Wilcox, formerly at JetBlue, said the company has agreed to purchase 50 Embraer Phenom 100 very light jets plus has options on an additional 50 Phenom aircraft family planes.
